

RED GRANDIS

Sustainable forests

URUFOR is committed to grow, manufacture, and market high quality Eucalyptus Grandis timber products

URUFOR is a vertically integrated company committed to grow, harvest, produce and export high quality RED GRANDIS™ (Eucalyptus Grandis) lumber.

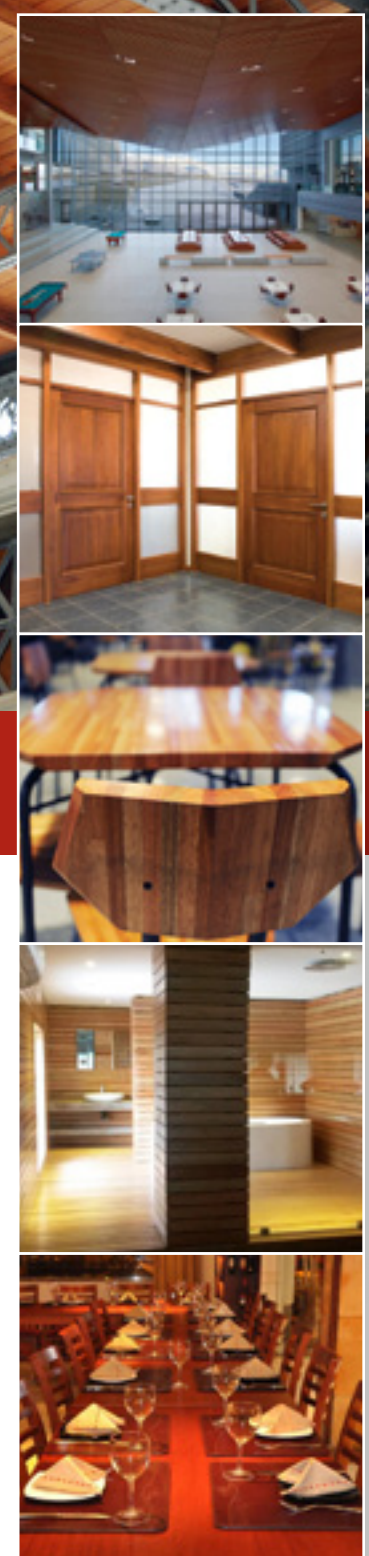

The company owns over 85,000 acres of net plantation forest in the north of Uruguay, all 100% FSC Eucalyptus Grandis.

The harvest is performed within a 20 years growing cycle, and it is carried out uninterruptedly the whole year round.

The logs are processed at the new sawmill 70 million BF output capacity, 47 kilns with a 4.2 million BF drying capacity, and a remanufacturing plant (glued and laminated products).

For information regarding Red Grandis wood products, please visit www.redgrandis.com.

RED GRANDIS

- All production 100% FSC® Certified
- 1 Species + 1 Plantation + 1 Mill = **The most consistent product**
- Machines and finishes very well
- Green alternative to many tropical species
- Vertically integrated family owned company
- Available in abundance for generations to come...

Average Density (at MC 12%)	575 kg/m ³
Modulus of Rupture (psi)	11250
Modulus of Elasticity (psi)	1.42E + 06
Janka Hardness (lbs)	720
